# FOOD SAFETY AND STANDARDS AUTHORITY OF INDIA (FSSAI)

*Recognised Third-Party Food Safety Audit Report*

| | |
|---|---|
| **Audit Report ID:** | Report_014 |
| **Industry Sector:** | Milk Processing |
| **Facility Name:** | Deccan Cold Chain Logistics |
| **Location:** | Indore, Madhya Pradesh (Tier-2) |
| **Lead Auditor:** | Harpreet Kaur |
| **Audit Date:** | 2026-09-20 |
| **Compliance Profile:** | Clean (Benchmark Standard) |

## AUDITOR OBSERVATIONS & ASSESSMENT NARRATIVE

On 2026-09-20, food safety auditor Harpreet Kaur conducted an on-site audit at Deccan Cold Chain Logistics situated in Indore, Madhya Pradesh (Tier-2). Regarding food material is tested either through internal laboratory or through an accredited lab, the facility demonstrated full compliance and verified all related operational records. Regarding pasteurization temperature & holding time (htst: 72°c/15 sec; batch: 63°c/30 min; uht: 135°c/1-2 sec) are properly maintained, the facility demonstrated full compliance and verified all related operational records. Regarding the internal structure & fittings are made of non-toxic and impermeable material, the facility demonstrated full compliance and verified all related operational records. Regarding recalled products are held under supervision & are destroyed or reprocessed/reworked in a manner to ensure their safety, the facility demonstrated full compliance and verified all related operational records. Regarding doors are close fitted at all ends to avoid entry of pests, the facility demonstrated full compliance and verified all related operational records. Regarding internal / external audit of the system is done periodically, the facility demonstrated full compliance and verified all related operational records. Regarding appropriate documentation & records are available and retained for a period of one year or shelf-life of product, whichever is more, the facility demonstrated full compliance and verified all related operational records. Regarding annual medical examination & inoculation of food handlers against the enteric group of diseases as per recommended schedule of vaccine is done, the facility demonstrated full compliance and verified all related operational records. Regarding measuring & monitoring devices are calibrated periodically, the facility demonstrated full compliance and verified all related operational records. Regarding raw milk when brought to dairy plant by farmers, should reach the plant within 4 hours from milking & is cooled to 5°c or lower as quickly as possible, the facility demonstrated full compliance and verified all related operational records. Regarding incoming material, semi or final products are stored according to their temperature and humidity requirement, in a hygienic environment, the facility demonstrated full compliance and verified all related operational records. Requirement for potable water (meeting standards of is:10500) is used as product ingredient or in contact with food or food contact surface is not applicable to current facility operations and scope. Regarding requisite time and temperature is being achieved, maintained, monitored & recorded while manufacturing/processing, the facility demonstrated full compliance and verified all related operational records. Regarding post pasteurisation process, milk is cooled immediately to a temperature of 4°c or lower, the facility demonstrated full compliance and verified all related operational records. Requirement for packing or filling of heat treated milk and milk products are carried out hygienically is not applicable to current facility operations and scope. Regarding walls, ceilings & doors are free from flaking paint or plaster, condensation & shedding particles, the facility demonstrated full compliance and verified all related operational records. Regarding no person suffering from a disease or illness or with open wounds or burns is involved in handling of food or materials which come in contact with food, the

facility demonstrated full compliance and verified all related operational records. Requirement for transporting vehicles for carrying milk are capable of meeting requisite temperature (where applicable) is not applicable to current facility operations and scope. Regarding design of food premises provide adequate working space; permit maintenance, cleaning & prevent entry of dirt, dust & pests, the facility demonstrated full compliance and verified all related operational records. Requirement for pest control program is available & pest control activities are carried out by trained and experienced personnel is not applicable to current facility operations and scope. Regarding windows are kept closed & fitted with insect proof screen when opening to an external environment, the facility demonstrated full compliance and verified all related operational records. Regarding packaging materials is food grade & in sound condition, the facility demonstrated full compliance and verified all related operational records. Regarding an adequate storage facility for food, packaging materials, chemicals, personnel items etc is available, the facility demonstrated full compliance and verified all related operational records. Regarding raw milk received through bulk chilling centres, the temperature of milk is maintained at 5°c or lower, the facility demonstrated full compliance and verified all related operational records. Regarding cleaning of equipment (preferably cip), food premises is done as per cleaning schedule & cleaning programme, the facility demonstrated full compliance and verified all related operational records. Regarding preventive maintenance of equipment and machinery is carried out regularly as per instructions of manufacturer, the facility demonstrated full compliance and verified all related operational records. Regarding transporting vehicle for food use are kept clean and maintained in good repair, the facility demonstrated full compliance and verified all related operational records. Regarding food business has an effective consumer complaints redressal mechanism, the facility demonstrated full compliance and verified all related operational records. Regarding food handlers maintain personal cleanliness (clean clothes, trimmed nails & water proof bandage etc) and personal behaviour (hand washing, no loose jewellery, no smoking, no spitting etc), the facility demonstrated full compliance and verified all related operational records. Regarding cleaning chemicals & other hazardous substance are clearly identified & stored separately from food, the facility demonstrated full compliance and verified all related operational records. Regarding disposal of sewage and effluents is done in conformity with standards laid down under environment protection act, 1986, the facility demonstrated full compliance and verified all related operational records. Regarding equipment and containers are made of non-toxic, impervious, non-corrosive material which is easy to clean & disinfect (preferably ss 316 for equipment & ss 304 for tanks/tankers), the facility demonstrated full compliance and verified all related operational records. Regarding personnel hygiene facilities are available, the facility demonstrated full compliance and verified all related operational records. Regarding incoming material is procured as per internally laid down specification & from approved vendors, the facility demonstrated full compliance and verified all related operational records. Requirement for premise has sufficient lighting is not applicable to current facility operations and scope. Regarding effluent treatment plant (etp) is in place, the facility demonstrated full compliance and verified all related operational records. Requirement for milk & other raw material are inspected at the time of receiving for food safety hazards is not applicable to current facility operations and scope. Observation for food establishment has an updated fssai license and is displayed at a prominent location: partial implementation was noted, though formal documentation or log frequency showed procedural gaps. Regarding adequate ventilation is provided within the premises, the facility demonstrated full compliance and verified all related operational records. Regarding milk is brought to the collection centre within 4 hours and immediately chilled to a temperature of 4°c or lower, the facility demonstrated full compliance and verified all related operational records. Regarding separate processing facilities available for heat treated milk & milk products to avoid cross contamination, the facility demonstrated full compliance and verified all related operational records. Regarding food handlers are equipped with suitable aprons, gloves, headgear, shoe cover etc; wherever necessary, the facility

demonstrated full compliance and verified all related operational records. Regarding food waste and other refuse are removed periodically from food handling areas to avoid accumulation, the facility demonstrated full compliance and verified all related operational records. Regarding food handlers have the necessary knowledge and skills & trained to handle food safely, the facility demonstrated full compliance and verified all related operational records. Regarding no signs of pest activity or infestation in premises (eggs, larvae, faeces etc, the facility demonstrated full compliance and verified all related operational records. Observation for floors are non-slippery & sloped appropriately: partial implementation was noted, though formal documentation or log frequency showed procedural gaps. Regarding raw milk reception dock (rmrd) facility is sufficiently raised with sides & top to prevent contamination while unloading of raw material, the facility demonstrated full compliance and verified all related operational records. Regarding drains are designed to meet expected flow loads and equipped with traps to capture contaminants, the facility demonstrated full compliance and verified all related operational records.

*Official Endorsement: The findings detailed above represent factual conditions observed on-site by recognised food safety auditing personnel. Observations have been documented according to statutory requirements under the Food Safety and Standards (Food Safety Auditing) Regulations.*
